

Clinical Guardian

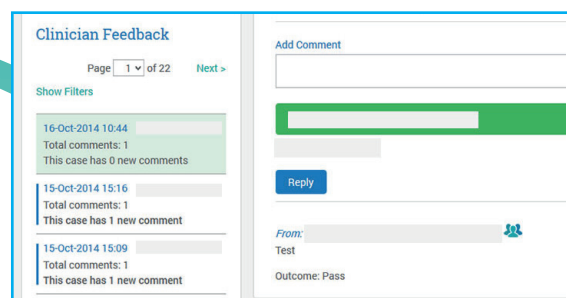

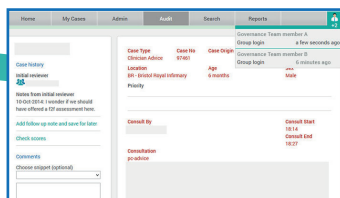

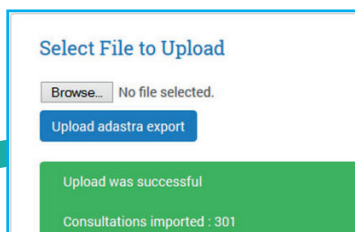

The comprehensive governance solution

Clinical Guardian is a systematic approach to clinical governance. It is a dynamic online database which facilitates the governance process. Our system provides paperless governance; saving countless hours & stacks of paper.

Core Clinical Guardian Features

- Focussed auditing of cases
- Categorisation of clinicians
- Feedback between auditor & clinician
- Performance Reporting
- Productivity Reporting

Timeline of a case in CG

- Data is uploaded into CG.
- Cases and clinicians are identified.
- Cases are presented for auditing based on the clinicians colour categorisation.
- Auditors score those cases, if unsure of any, then pass to group review.
- Audit group discuss those referred cases, and decide result / action.
- Clinicians are notified of any comments on their cases - directed to reply if they want.
- Auditors notified of clinician replies, and can add their own reply, which notifies clinician
- Clinicians can download their own feedback comments / case outcomes as useful information for their appraisal.
- Organisations can report on various measures of performance and productivity, as well as common areas for improvement.

Auditor	Total cases scored	% Referred to group review	% Above satisfactory	Average time scoring
	925	18.86	1.33	0:01:31
	2003	8.24	30.20	0:00:55
	154	20.13	0.00	0:00:55
	2	0.00	0.00	0:04:35
	1566	8.49	2.43	0:01:16
	306	17.32	3.27	0:01:44
	989	2.92	1.46	0:01:00
